Volume 29, 1981

ARTICLES *(by title)*

Can images provide contextual support for prose? Robert M. Bernard, Chris H. Petersen, and Mohamed Ally, 29:2 101–108

A combined pictorial mnemonic strategy for ordered information, Joel R. Levin, Christine B. McCormick, and Beverly J. Dretzke, 29:4 219–225

Criteria for assessing the trustworthiness of naturalistic inquiries (ERIC-ECTJ annual review paper), Egon G. Guba, 29:2 75–91

ECTJ/ERIC-IR Young Scholar Paper—Successful instructional methods: A cognitive information processing approach, Ruth Colvin Bovy, 29:4 203–217

Effects of language level and visual display on learning from captioned instruction, Barbara B. Braverman, Melody F. Harrison, Duane O. Bowker, and Melody Hertzog, 29:3 147–154

ERIC/ECTJ annual review paper—Criteria for assessing the trustworthiness of naturalistic inquiries, Egon G. Guba, 29:2 75–91

An exploratory investigation into factors affecting visual balance, Walter Niekamp, 29:1 37–48

Future trends in the production of instructional materials: 1981–2001, Deane K. Dayton, 29:4 231–249

Historical overview of formative evaluation of instructional media products, Marjorie A. Cambre, 29:1 3–25

Interactions between student achievement orientation, locus of control, and two methods of college instruction, Jon R. Root and Meredith Damien Gall, 29:3 139–146

A meta-analysis of outcome studies of visual-based instruction, Peter A. Cohen, Barbara J. Ebeling, and James A. Kulik, 29:1 26–36

Note-taking: A significant and integral part of learning environments, Ludwig Ganske, 29:3 155–175

On the contributions of music to media productions, Steven A. Seidman, 29:1 49–61

Processing information from screen media: A psycholinguistic approach, Farrel Corcoran, 29:2 117–128

Relationship between eye movement, learning, and picture complexity, Larry L. Nesbit, 29:2 109–116

Research in AVCR: A critical review, John A. Hortin and Dennis E. Sheriff, 29:4 227–230

Research on pictures in instructional texts: The need for a broadened perspective, Philip J. Brody, 29:2 93–100

Successful instructional methods: A cognitive information processing approach (ECTJ/ERIC–IR Young Scholar Paper), Ruth Colvin Bovy, 29:4 203–217

Visual testing—Visual literacy's second dimension, Michael Szabo, Francis M. Dwyer, and Hermes DeMelo, 29:3 177–187

RESEARCH ABSTRACTS
(by title)

Attention to instructional media: What are the relevant media techniques and learner characteristics? Malcolm Fleming and others, 29:2 135
Attitude and performance of military students and instructor attitude in computer-based technical training. MTC report no. 23, Kikumi K. Tatsuoka and Lynn A. Misselt, eds., 29:4 255–256
The cognitive effect in bilingual learners given different pictorial elaboration and memory tasks, Carlos A. Acevedo and Richard J. Lamberski, 29:2 135–136
Cognitive style predictors of performance, David Jonassen, 29:2 136
Computer-assisted, programmed text, and lecture modes of instruction in three medical courses: Comparative evaluation. Final report, Gerard M. Deignan and others, 29:2 133
Computer managed instruction in the Navy: II. A comparison of two student/instructor ratios in CMI learning centers. Technical report, Nick Van Matre and others, 29:4 255
The danger of relying solely on diagnostic adaptive testing when prior and subsequent instructional methods are different. Research report no. 2, Kikumi Tatsuoka and Menucha Birenbaum, 29:1 70–71
Differential response to cueing and feedback in the acquisition of an inductively presented biologic concept, John J. Koran, Jr., and others, 29:1 71–72
The effect of level of knowledge of the subject on the instructional effectiveness of illustrations which integrate abstract and realistic visualization, John H. Joseph, 29:3 198–199
Effects of alternative response mode requirements on the accuracy of student response in computer-based testing. Report series 1979, David B. Thomas, 29:1 72
The effects of the television series "Feeling Free" on children's attitudes toward handicapped people, Kim Susan Storey, 29:4 257–258
Evaluating student performance and attitudes in response to videotaped self-instruction, John R. Boker, 29:3 200
Experience vs. two kinds of feedback in CAI problem solving, Esther R. Steinberg, 29:2 134
Field dependence/field independence and instructional development, Dennis E. Sheriff and John A. Williams, 29:3 199
Field independence and the effect of background music on film understanding and emotional responses of American Indians, Josephine Raburn, 29:3 198
Human decision-making in computer-aided fault diagnosis. Technical report 434. Final report, William B. Rouse and others, 29:2 134
Humorous illustrations in textbooks: Effects on information acquisition, appeal, persuasibility, and motivation, Jennings Bryant and others, 29:4 258
The influence of the medium on children's story apprehension, Laurene K. Meringoff, 29:3 198
Investigations with calculators: Abstracts and critical analyses of research, Marilyn N. Suydam, ed., 29:4 258–259
Is visual information processing related to reading? John C. Palmer and others, 29:4 258
Learners cognitive style and levels of learning in television and print instruction for use in open learning: An exploratory study, J. E. Danielson and William J. Seiler, 29:1 71
A meta-analytic study of pictorial stimulus complexity, Francis E. Clark and Jay F. Angert, 29:3 197
Mystery or mastery? An evaluation of performance-based teacher education for TAFE teachers in Australia, Barry R. Hobart and Roger McL. Harris, 29:4 256–257
Narration, detail, and event relevance in illustrated materials, Janet L. Whitaker and Howard J. Sullivan, 29:3 197–198
Pilot project in computer assisted instruction for adult basic education students. Adult Learning Centers, The Adult Program, Great Neck Public Schools, Great Neck, New York. Final three year report (2/77–6/79), Elizabeth Buckley and David Rauch, 29:4 256

Proceedings of selected research paper presentations at the 1980 convention of the Association for Educational Communications and Technology and sponsored by the Research and Theory Division, Michael R. Simonson and Daniel Rohner, eds., 29:2 135
Results of computer assisted instruction at Bath Elementary School, Martha Holden Jennings Foundation, 29:3 200
Shipboard instruction and training management with computer technology: A pilot application, John A. Dollard and others, 29:3 199
Simulation activities and student learning characteristics in a college economics survey course, John W. Fraas and Frederick J. Rafeld, 29:1 71
Student attitudes to radio. I.E.T. papers on broadcasting: Number 108, Duncan H. Brown, 29:2 133–134
Systematized feedback and mathematics performance, Michael J. Hannafin, 29:2 136
Television-mediated education for the visually impaired: A longitudinal investigation, Thomas H. Bikson and others, 29:1 70
A test of four slow-scan television systems for remote teaching, Donald Creswell Peters, Jr., 29:4 257
Use of a simulation program for teaching graduate reading diagnostic skills, Shirley Feldman and others, 29:3 200
